

Celerity Data Inc is proud to introduce the most advanced Liquor Store Management System to Canada's emerging private liquor industry. Celerity knows what a Liquor Store operator requires today while continually developing for changing needs in the future.

Infinity Liquor Management System is a powerful, flexible platform enabling integration with popular accounting packages, merchandising systems and loyalty programs.

As technologies have evolved in recent years, market expectation of what a retail point of sale system should deliver has escalated. Today's retail operators and IT managers want single platform, scalable POS systems at a competitive price. They are interested in a robust POS database structure and a foundation that enables them to include their unique business requirements. Liquor Store management has never been easier with Infinity Liquor Management System.
